Plantogotichi

By Alex Coole and Ping Nge
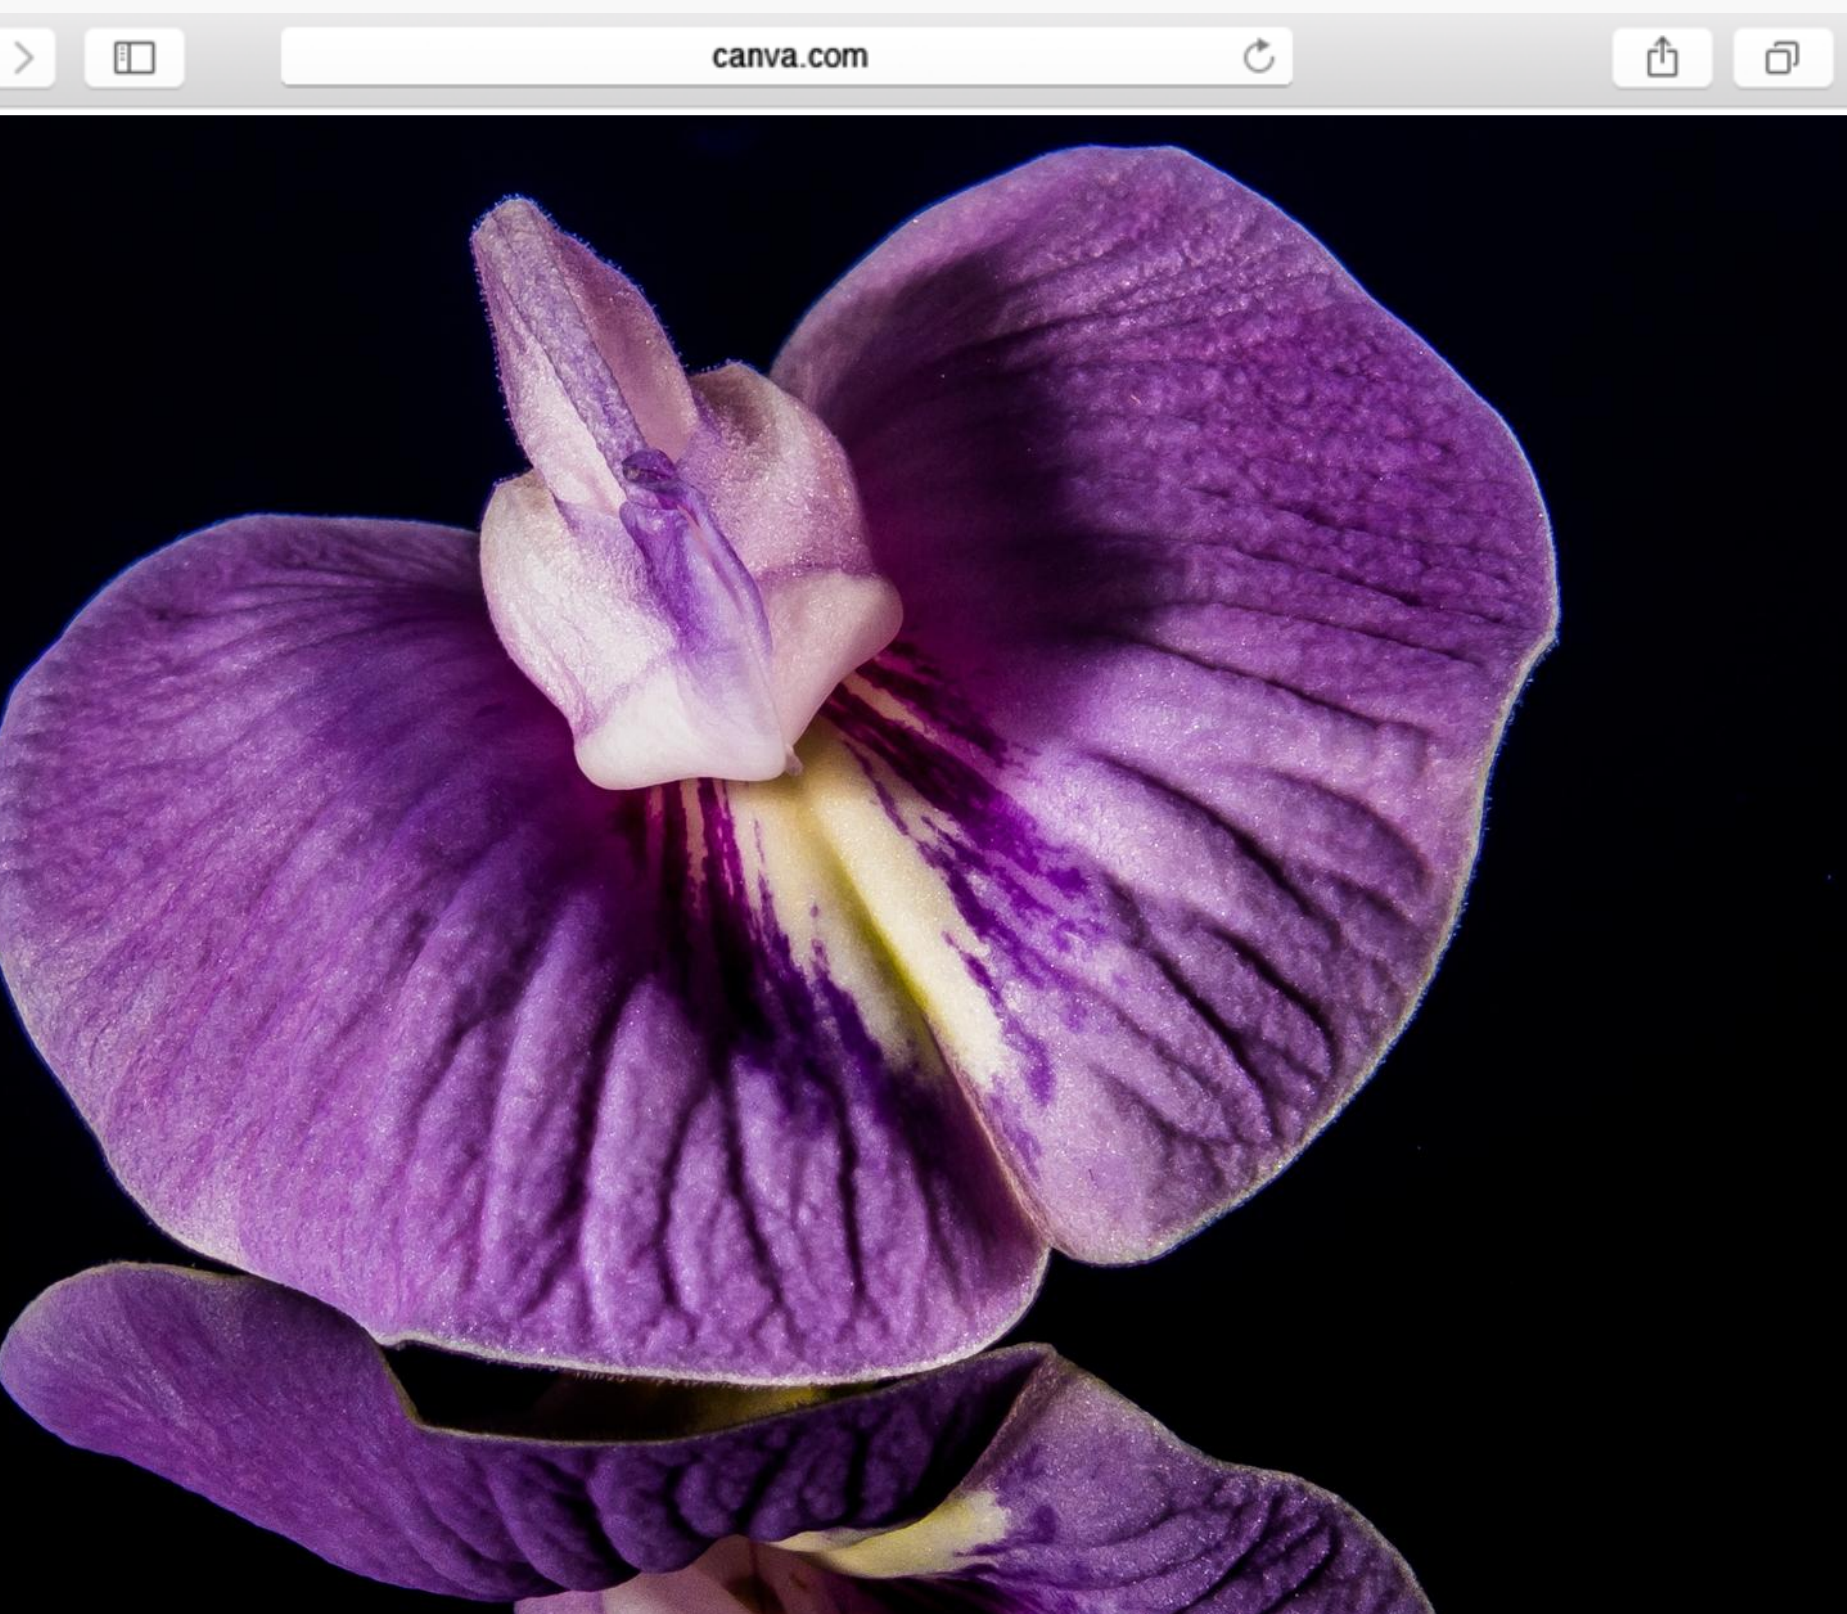

Purpose

WHAT IS PLANTOGOTCHI?

Plantogotchi is a simple React application which allow user to take care of plants virtually from anywhere and at anytime.
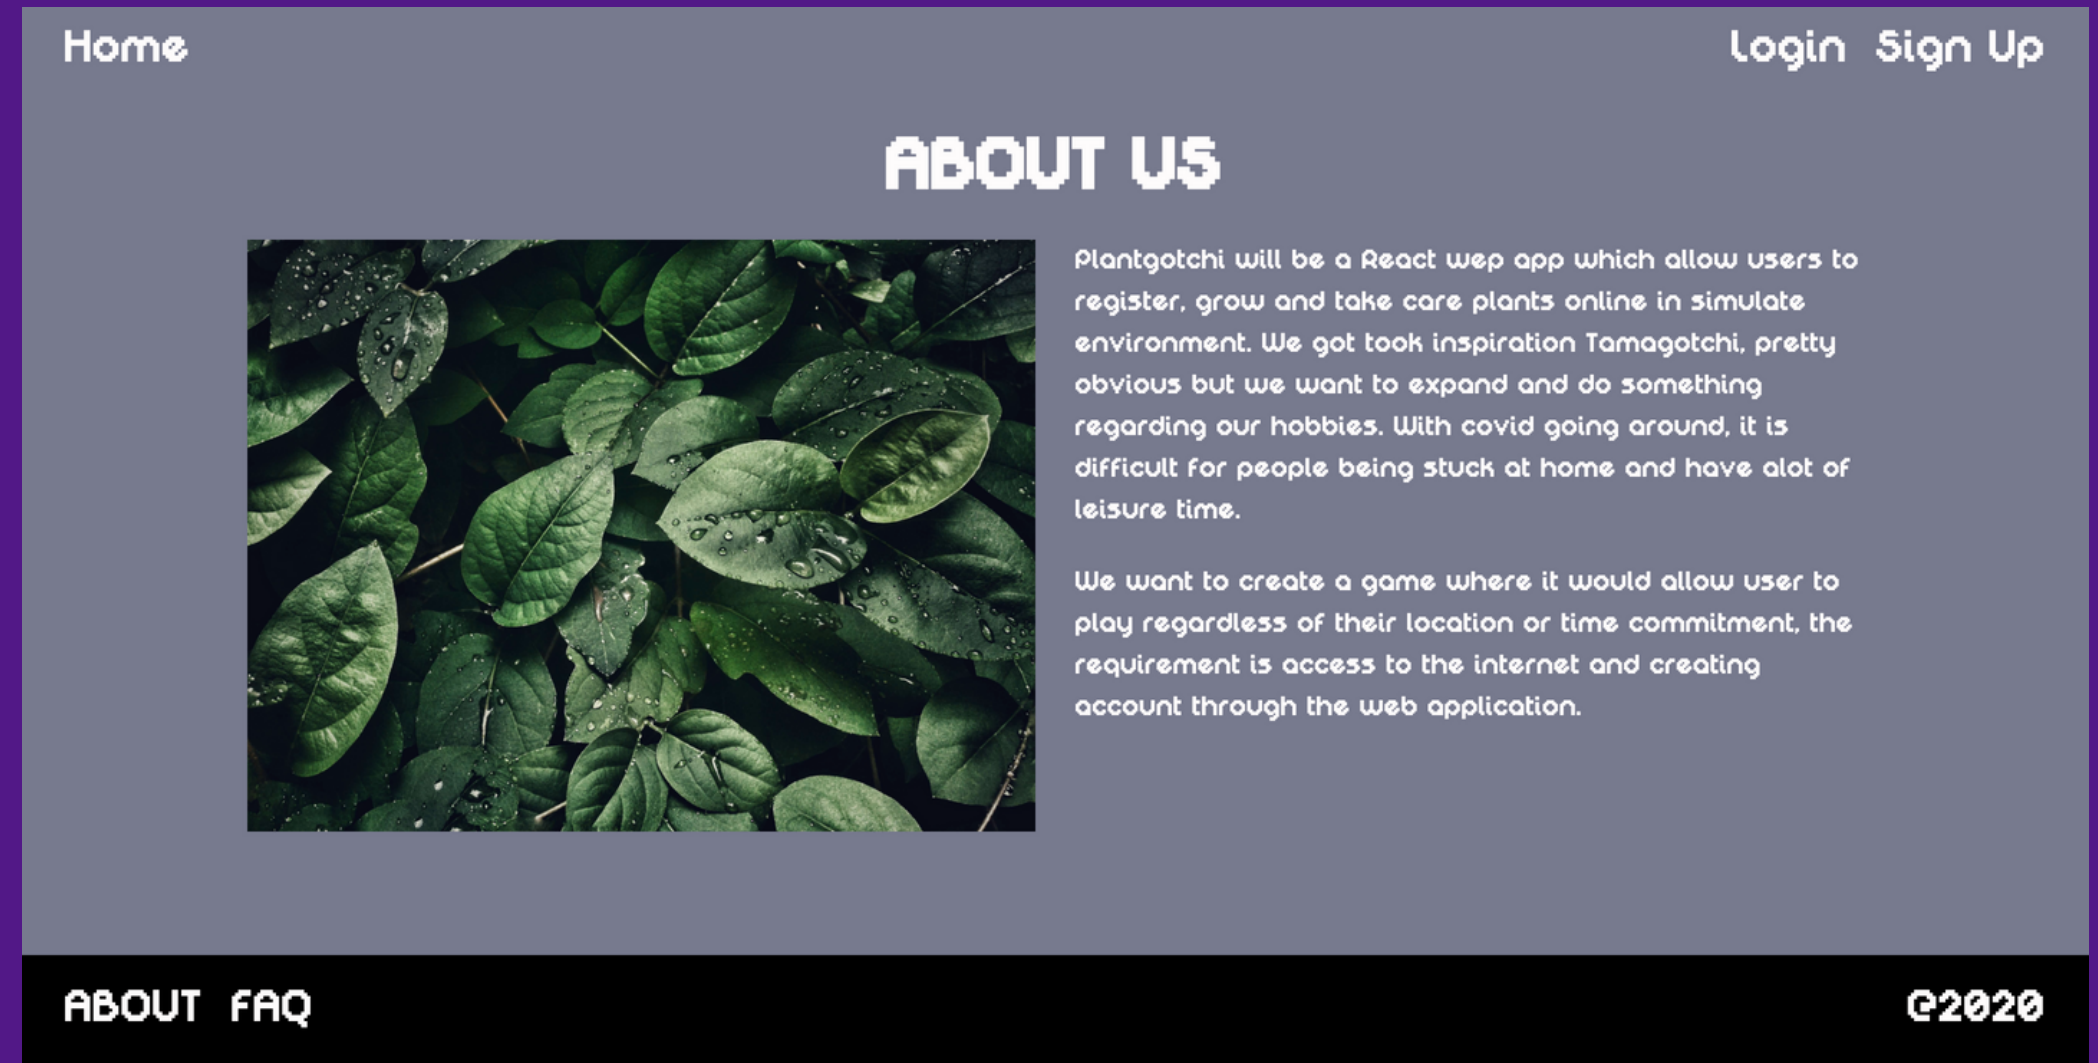

Problem

COVID-19

With covid, we are stuck at home and people have more time. Thus we wanted to create an application that allow users to do what they alway wanted. Gardening from anywhere, even in bed, in the shower or anywhere else with internet.
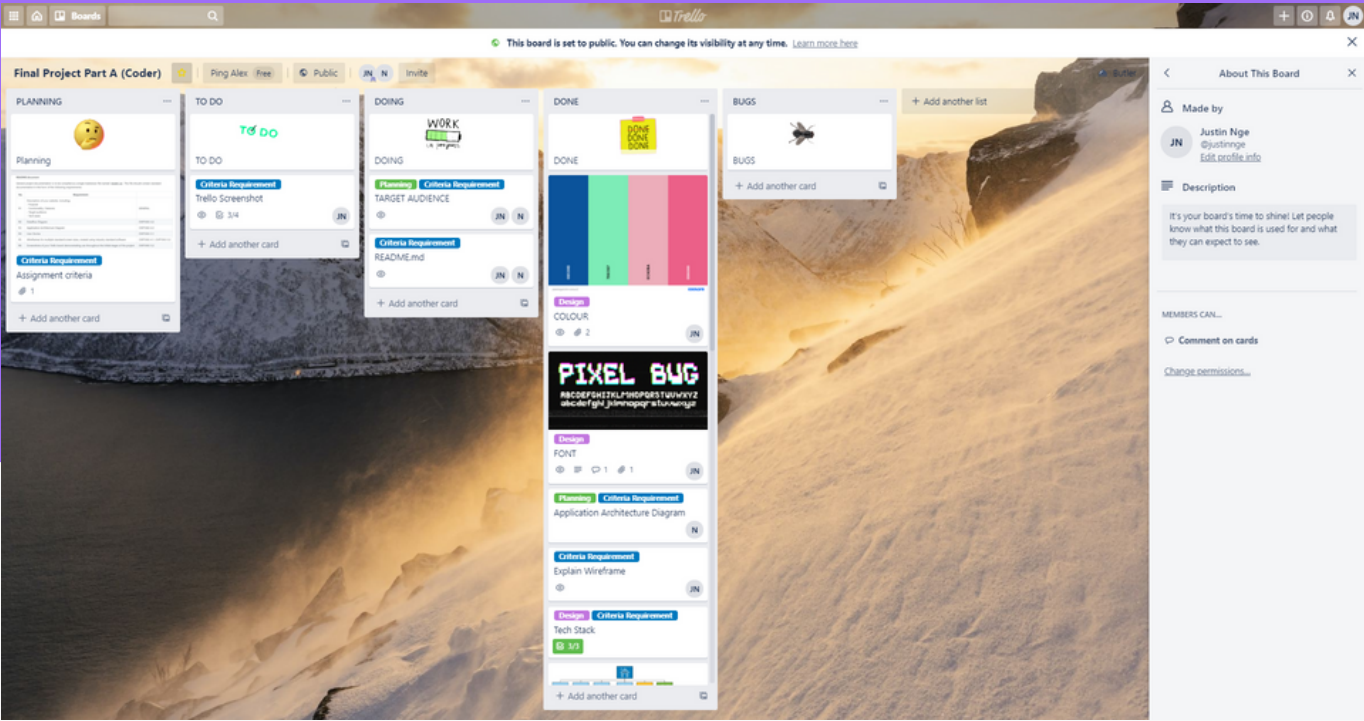

Library we used

- Axios
- Knock
- AWS3
- Semantic Ui React
- Node Sass
- Cypress
- Testing-Library
- Rspec
- Simple Cov

TASK MANAGEMENT

Part A

Part B

Plantogotchi Features

- Create a Plant
- Take Care of your plant
- Admin Slider to control the game

HOW IT WORKS
